

Indiana's leading team in the fight against lung and esophageal cancers

We don't just stay current on the latest thoracic cancer treatments. We help create them.

What sets us apart

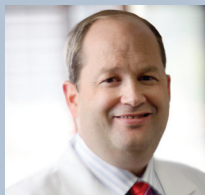

- Perform more surgeries for lung cancer than any other cancer center in Indiana
- First and most comprehensive minimally invasive and robotic thoracic procedures in the state
- Most advanced methods available for diagnosing and staging chest cancers
- First cancer center in Indianapolis to offer a blood test to screen for lung cancer
- Coordinated, multidisciplinary care among cancer specialists to ensure patients receive expert and expedited diagnosis and treatment
- Individualized chemotherapy based on tumor genetics
- State-of-the-art radiation therapy, providing maximum benefit while minimizing side effects
- Access to current investigational treatments and drugs through clinical trials sponsored by the National Cancer Institute and cooperative groups.
- Physicians named "Top Doctors" by *Indianapolis Monthly* magazine

Our scope of services

- Comprehensive care provided by thoracic surgeons, medical oncologists and radiation oncologists with special interest and training in lung and esophageal cancers
- Second opinions for patients and their loved ones
- Evaluation of patients with lung nodules
- Minimally invasive and robotic thoracic surgery
- Stereotactic radiation therapy
- Endobronchial ultrasound
- Esophageal ultrasound
- Specialized hospital units and nurses
- Specialized imaging studies
- Access to clinical trials
- Patient navigators to assist patients in their journey from diagnosis through and beyond treatment
- Post-treatment survivorship planning
- Smoking cessation support
- On-site chaplain
- Cancer support groups
- Guided imagery
- Pet therapy
